Profile

Inquisitive Information Technology professional leveraging my programming skills as a developer and contributing to advancements in the tech industry. I offer experience working in fast-paced, technological, and team-oriented environments and appreciate effective collaboration and hard work above all. I've specialized in .NET API and ETL development in my career so far, and am looking to grow my knowledge of software.

Experience

Application Developer & Analyst, Great American Insurance – Early 2020 - Present
Formulate system scope. Design, code, test, debug, document, and maintain application programs. Heavily utilize .NET Framework. Maintain and Contribute to .NET API web application. Develop and Maintain SSIS ETL Project. Write complex SQL queries, create and maintain database objects. Design and Develop RESTful API's. Build and manage SSIS and SSRS Objects. Manage MSSQL DataMart. Adhere to industry-standard best practices.

Quality Assurance Tester, Great American Insurance – Early 2019 - Early 2020
Created testing documentation, developed plans and conditions based on technical requirements. Maintained automation scripts and ensured adequate product testing prior to production implementation. Utilized Jenkins continuous integration software.

Multimedia Producer, Miami Township ; Milford OH – Mid 2016 - Early 2017
Created digital assets for television displays and digital signage around the community. Operated and Maintained Windows and Mac computers, camera equipment, and web server. Contributed to Miami Township website and television station.

Education

Northern Kentucky University, Highland Heights KY – B.S Information Technology ; Fall 2021

Skills

Object-Oriented Programming - Java, C#, Python, .NET Framework, Test-Driven Development

Database Management / Data Analysis - SQL (MSSQL, Oracle), SQL Server Integration Services (SSIS), SQL Server Reporting Services (SSRS), Snowflake

Markup Languages - XML, JSON

Web Development - HTML, CSS, PHP, JavaScript

System Admin - Powershell, Linux CLI, BashScript

Agile Methodologies - SCRUM, Rally

MS Suite - Word, Excel

Source Control - Redgate, TFS, Git

API Development - REST, Postman

Workflow Automation - ServiceNow, UC4 Job Automation

Cloud Development - Snowflake, Informatica Intelligent Cloud Services (IICS)

Projects

DataMart Service Project

.Net 6 Asynchronous API Web Application - managed requests to and from the server. Co-developed and maintain application

DataMart SSIS Project

Maintained and developed SSIS project - DTSX Packages, Connection Managers, Project Configuration

Informatica IICS Project

Developing IICS Cloud ETL environment and integrating with Snowflake cloud computing.
